- Converted UI designs into code, construction company official websites and product sites. Proficient in crafting responsive websites and adept in html,css and javascript.
- Developed an admin management software using react with typescript from the ground level and enhanced logical thinking skills while mastering the creation of dynamic application and integrating API
- Learned ground-level work, completed tasks on time, and adopted agile methods of working, understanding requirements effectively.

SKILLS

Technical skill: JAVASCRIPT , REACT , CSS , HTML , BOOTSTRAP, GIT
Othere skill: Problem solving, Troubleshooting, Responsive Design, browser-based debugging

PROJECTS

FOOD SHARING WEB APPLICATION platechange.onrender.com

- Plate Change is an innovative web application designed to facilitate the sharing and selling of homemade food within local communities.
- The project showcases my ability to develop a full-fledged frontend application from scratch, utilizing modern web development technologies and best practices.
- Plate Change not only highlights my technical skills in React.js and frontend development but also demonstrates my ability to build practical solutions that address real-world problems.

TECHNIQUES TO REDUCE ELETRICITY BILL ebcalculator.netlify.app

- "Techniques to Reduce Electricity Bill" is a comprehensive web application designed to help users understand their electricity consumption and discover effective strategies to reduce their electricity bills.
- The project includes a dynamic electricity bill calculator, an interactive electricity unit per rate chart, and valuable tips for energy conservation.
- "Techniques to Reduce Electricity Bill" highlights my ability to build practical, user-focused applications that provide real-world value.

Dynamic Image Gallery imagehaven.onrender.com

- Designed and developed the frontend of dynamic image gallery web application from scratch, focusing on user experience and performance.
- Implemented search and filter functionalities to allow users to find images easily and sort them by categories.
- Added image download and image like feature,enabling users to save their favorite images directly from the gallery.Ensured the application supports endless scrolling and pagination for a seamless user experience.

EDUCATION

Agurchand Manmull Jain College   **2020 - 2023**
Bachelor Degree in Commerce (Computer Application)
